HOW TO OPEN YOUR WAX-TOPPED BOTTLE

1

Warm up the top of the wax with the palm of your hand.

2

Insert double-hinged corkscrew directly into the top of the wax.

3

Remove just like a regular bottle!

AGING LARGE FORMAT BOTTLES

Did you know that wine stored in larger bottles ages better?

There is a greater volume of wine relative to the oxygen inside the bottle.

This makes the slow oxidative process (that happens naturally in the bottle)

take longer, giving you greater potential aging time. Larger bottles

tend to be more stable, are not as prone to temperature fluctuations,

and can even develop more complexity than their smaller-bottle counterparts.

For the serious collector, no cellar is complete without big bottles!
